

## Miscellanea

# *seismic data processing*

### OBJECTIVES

- > To provide participants with specific knowledge of the conventional and advanced Seismic Data Processing methodologies; to expound processing capabilities and limitations; to illustrate and evaluate a processing sequence

### TARGET AUDIENCE

The course is designed for Geophysicists directly involved in seismic data acquisition or processing; geophysicists and geologists working in exploration or production, interested in a better understanding and use of seismic data

### CONTENTS

#### **The Course Adopts An Interdisciplinary Approach To Data Acquisition And Covers The Following Topics:**

- > The integrated seismic process, a seismic processing sequence
- > Fundamentals of digital signal processing
- > Marine data processing
- > Land data processing
- > 3D surveys

### DURATION

5 days From 9 a.m. to 5 p.m.

ISS International Viale Manzoni, 28 - 00185 Roma - Phone: +39 06 97961201
